

We support Emergency Planning functions by carrying out studies and assessments and producing plans and reports for specific requirements. We take a logical approach and work in partnership with operational staff to capture the knowledge and experience. The aim is to provide clear, concise and consistent reports

- Demand management plans
- Total loss contingency plans
- Strategic stock / equipment assessment
- Trunk main security
- Risk assessment
- Manpower Resources Summary
- Feasibility studies
- Cost estimates

We have wide-ranging experience in the water industry and a flexible approach to any established or new areas of strategic planning.

The structure diagram below was developed specifically for the water industry, but provides a template for any field of strategic planning:
